FREE FIRE LEGAL HEADSHOT SETTINGS

Starter sensitivity settings for practice — not a hack or panel.

■ Sensitivity Settings

- General: 190
- Red Dot: 185
- 2x Scope: 175
- 4x Scope: 160
- Sniper Scope: 100
- Free Look: 150

Headshot Practice Tips

1. In Training Ground, aim near the opponent's upper body and gently drag upward while firing.
2. Adjust sensitivity in small steps if your aim goes too high or feels slow.
3. Customize your HUD and fire-button size to what feels comfortable.

Important

These are suggested starting values, not guaranteed headshot settings. Results vary by device, game version, and personal control. Avoid third-party hack panels, aimbots, or anti-ban tools; they can risk your account.

Tip: Try the settings in Training Ground first, then fine-tune them before playing ranked matches.
